Capacity building of Local Youth on Education and Economics

## CONTEXT

There are 1093 Paudi Bhuyan Households in 35 villages of Lahunipada and Koira Blocks in Sundergarh District. The total population is 4376 out of which 2180 male and 2196 female. The Paudi Bhuyan of this area is one of the major sections of the Bhuyan tribe which has been identified as a primitive tribal group of the state. The Paudi Bhuyan villages are mostly located on the top and slopes of the hills and thinly distributed with maximum of 25 to 30 families. This community has been historically disadvantaged in social, economic and educational aspects and have had lower school participation in terms of enrolment and retention compared to the general population. One assuring fact is that the area is rich with natural resources like land, forest and water. But this has not been utilized properly and are exploited or misutilised by various actors. Therefore, the people have to be encouraged towards a more judicious use of natural resources for their own development because it is the people who can help themselves.

**EDUCATION:** Lack of education among the community, especially the tribal community has been the underlying factor of the underdevelopment of the community. 1 out of every 5 men and almost all the women are illiterate. They are not fully able to participate in the process of development, as they are not aware of most of the programmes and policies made for their upliftment. This is mainly due to the high incidence of illiteracy and very low level of education. Education is a crucial pathway in upgrading the economic and social conditions of the community. Education is in fact, an input not only for economic development but also for the inner strength of the communities, helping them to meet the new challenges of life.
